NOTES ON FORMAT

1. The format of the directory section of this report has been completely revised this year. Changes include listing all branches under the heading of the responsible library with "see references" from the branch name, including the name and address of the library board president and friends of the library chairperson when applicable, and moving the designation of type of library from the directory section to the statistical section.

2. The population figures given in the statistical portion of this report and used to compute all per capita figures are from the 1980 census unless marked with an asterisk(*). Figures marked with an asterisk(*) are estimates based on the 1980 census and were obtained from the six regional councils of government.

3. The per capita circulation, items, and funding figures for county libraries were calculated by subtracting the populations of those cities and towns with libraries from the total county population (communities with branch libraries were not subtracted). These figures were calculated in this manner because serving the unserved residents of the county was felt to be the responsibility of the county library utilizing the headquarters library, bookmobiles, books-by-mail and other means.

4. The statistical portion of the directory includes a section on accessibility for handicapped patrons. Areas that are accessible have been marked with "X"; those that are not have been marked with "-".

5. The total hours reported in the statistical section are winter service hours. In some instances, summer hours will be different.

6. The following abbreviations were used to indicate the type of facility.

   I Independent
   B Full Branch
   A Affiliate
   S Separate room in school
   SG Separate room on school grounds
   DC Deposit collection - no services
   JO Joint occupancy with another agency
